# Launchpad Controls Cheat Sheet

FREE CLASSROOM RESOURCE

| Context | Controls |
|---|---|
| **Camera** | Middle-drag pans · right-drag orbits · mouse wheel zooms · Home recenters. Flight also supports left-drag orbit. |
| **Flight** | Space = stage / fire · Z = full throttle · X = cut engine · Shift / Ctrl = adjust throttle · W A S D Q E = attitude · T = SAS · R = RCS · G = landing gear · M = map |
| **Time** | [.] speeds up time · [,] slows it back down |
| **Builder** | Click and drag parts · Shift-click adds to selection · drag on empty space for a box selection · Space cycles tools · Delete removes · Ctrl+Z / Ctrl+Y undo / redo |
| **EVA** | R = jetpack · W A S D = camera-relative motion · Shift / Ctrl = up / down · B = brake assist · F = board when close and slow |

## Tips

- Always predict before you fire the engine.
- Change only one thing at a time so you know what caused the result.
- Progress is saved in your own browser on this device. Using a different browser or computer starts fresh.
